

## **PCT LTD Receives Patents for RFID Tracking Technology in Cleaning System**

LITTLE RIVER, S.C., May 10, 2018 (GLOBE NEWSWIRE) -- PCT LTD, formerly Bingham Canyon Corporation, (OTC Pink:BGHM), a leader in environmentally safe technologies and products, recently announced approval for patents within its Annihilyzer® System for Infection Control in hospitals. The Tracking Technology is an essential component of the Annihilyzer® Cleaning, Sanitizing & Disinfecting System Solution and provides PCT with a monopoly market-entry position in the hospital facilities services market.

The company was awarded US Patent#9679170 for the Annihilyzer® Product and Room Tracking Protocol/Monitoring System Software with additional, enhancing patent claims pending. The Annihilyzer® uses RFID/NFC technology to provide cleaning staff through mobile data devices with specific protocols for cleaning each room or area and to capture product expiration and usage information. When a container is filled, an expiration date is assigned to the container and imprinted on the RFID tag embedded in the bottle's label. The system keeps track of who filled the container and when, where the product was used and when, and if cleaning and disinfecting protocols were followed. This data is stored in a cloud-based system where management can easily retrieve it in a variety of reporting formats.

The Annihilyzer® System is a revolutionary system solution for infection control, providing product generation, containerization, and delivery combined with the patented total inventory and activity tracking, reporting, and management of Hydrolyte® "Green Cleaning" and infection control systems which have commercial applications in for facilities in a variety of industries. These industries include medical facilities, school systems, resorts and hotels, correctional facilities, and food processing and services to name a few.

The Annihilyzer® System is Green Seal™ Certified and produces two Green Seal™ Certified products (GS-37 and GS-53), which demonstrates highly effective solutions in both cleaning performance and germ control. The Green Seal mark represents compliance with a rigorous set of criteria designed to achieve leadership levels of sustainability. Companies with Green Seal Certifications establish and maintain an ongoing commitment to health and the environment through periodic compliance monitoring and work toward continuous improvement. Green Seal™ Certification represents real and verified environmental improvement. Peer-reviewed research shows reduced environmental impacts resulting from products and services meeting the requirements for certification.

PCT provides integrated product and technology solutions for total facility cleaning and sanitizing. The Annihilyzer® technology will allow PCT to gain a distinct first mover advantage in the onsite product generation market by providing its patented product and process tracking systems, proprietary protocols and cleaning and disinfecting products to users in all facilities services markets.

### **About PCT**

PCT LTD. has focused its business on sustainable, environmentally safe technologies and products. The company acquires and holds rights to innovative products and technologies, which are commercialized through operating subsidiaries. Paradigm Convergence Technologies Corporation (PCT Corp) is the wholly owned operating subsidiary of PCT LTD. The business mission of PCT Corp. is in the prevention, treatment and control of infectious disease and microbial contamination. PCT Corp designs, develops, integrates, assembles and commercializes technologies, products and systems targeted at the

prevention and treatment of infectious disease and crop infestation. Its unique and patented systems and human-safe products provide next-generation cleaning, sanitizing, disinfecting and decontaminating fluid solutions to the ever-present problems of microbial infection and infestation.

Forward Looking Statements:

This release contains or may contain forward-looking statements and information that are based upon beliefs of, and information currently available to, management; as well as estimates and assumptions made by management. Such statements reflect the current view of the Company with respect to future events and are subject to risks, uncertainties, assumptions and other factors relating to the Company's industry, operations and results of operations and any businesses that may be acquired by the Company. Should one or more of these risks or uncertainties materialize, or should the underlying assumptions prove incorrect, actual results may differ significantly from those anticipated, believed, estimated, expected, intended or planned.
