

PCT LTD Received EPA Product Registrations for Disinfectant Products

LITTLE RIVER, S.C., May 22, 2018 (GLOBE NEWSWIRE) -- PCT LTD (OTC Pink:PCTL), a leader in environmentally safe technologies and products, recently announced approved EPA Product Registrations for its Hydrolyte® disinfectant products. These Registrations are required by EPA before the kill claims for effectiveness against specific microbial pathogens can be printed on the product label.

The company received US EPA Product Registration #92108-1. This registration indicates that the EPA was provided with sufficient independent laboratory AOAC efficacy testing data to support PCT claims that our Hydrolyte® product is effective in killing a broad range of microbial pathogens, including C-Diff, TB, HCV, HIV-1, CRE, VRE and MRSA, as well as other bacteria and viruses, qualifying Hydrolyte® as a hospital-level disinfectant.

Hydrolyte® also meets the disinfection requirements of OSHA Bloodborne Pathogen Guidelines, U.S. EPA and U.S. CDC criteria and guidance for using an EPA-registered hospital disinfectant with label claims for non-enveloped viruses (e.g. norovirus, rotavirus, adenovirus) to disinfect environmental surfaces, allowing it to be used to disinfect areas contaminated with Ebola when used as directed. Additionally, Hydrolyte® is effective in killing critical microbes found in the veterinary medicine setting: Bordetella, Canine parvovirus (parvo) and Canine distemper. These effectiveness “kill” claims, which are necessary for sales in the Veterinarian industry, will be printed on our “Vet” labels, opening that market sector for the company.

About PCT

PCT LTD has focused its business on sustainable, environmentally safe technologies and products. The company acquires and holds rights to innovative products and technologies, which are commercialized through operating subsidiaries. Paradigm Convergence Technologies Corporation (PCT Corp) is the wholly owned operating subsidiary of PCT LTD. The business mission of PCT Corp. is in the prevention and control of infectious disease and the pre-harvest prevention, control and suppression of microbial contamination of some commercial crops. PCT Corp designs, develops, integrates, assembles and commercializes technologies, products and systems targeted at the prevention and control of infectious disease and crop pathogens. Its unique and patented systems and human-safe products provide next-generation cleaning, sanitizing and disinfecting fluid solutions to the ever-present problems of microbial infection and infestation.

Forward Looking Statements

This release contains or may contain forward-looking statements and information that are based upon beliefs of, and information currently available to, management; as well as estimates and assumptions made by management. Such statements reflect the current view of the Company with respect to future events and are subject to risks, uncertainties, assumptions and other factors relating to the Company’s industry, operations and results of operations and any businesses that may be acquired by the Company. Should one or more of these risks or uncertainties materialize, or should the underlying assumptions prove incorrect, actual results may differ significantly from those anticipated, believed, estimated, expected, intended or planned.
